

Atty. Docket No. OPP030889US/PPW06-563DS  
Serial No: 10/676,645

Amendments to the Claims

Please cancel Claims 21, 25, 26 and 33, add new Claim 35, and amend the remaining Claims as shown below.

Listing of Claims

1. (Currently Amended) A semiconductor device comprising:  
a via within an insulation layer over a semiconductor substrate;  
a barrier metal layer on a surface of the via;  
a metal line in the via over the barrier metal layer;  
a pad in a predetermined region of the metal line; and  
an alloy layer on an upper surface of the metal line, wherein a top surface of the alloy layer is coplanar with or lower than a top surface of the insulation layer, and the alloy layer comprises a reaction product of a metal of the metal line and a low melting point metal having a melting point less than or equal to 1000°C.
2. (Previously Presented) The semiconductor device of claim 1, wherein the metal line comprises copper.
3. (Original) The semiconductor device of claim 1, wherein the metal having the melting point less than or equal to 1000°C is selected from the group consisting of aluminum, lead, and silver.
4. (Previously Presented) The semiconductor device of claim 1, wherein a thickness of the alloy layer is less than a thickness of the metal line.

Atty. Docket No. OPP030889US/PPW06-563DS  
Serial No: 10/676,645

5. (Currently Amended) The semiconductor device of claim 1, further comprising wherein a protection layer ~~made of~~ comprising silicon nitride or silicon oxynitride ~~is formed on~~ the metal line except for the predetermined region ~~where a pad is formed~~.

6. (Canceled)

7. (Canceled)

8. (Previously Presented) The semiconductor device of claim 5, wherein a width of the pad is less than a width of the via.

9-20. (Previously Canceled)

21. (Canceled)

22. (Currently Amended) The semiconductor device of claim ~~21~~, wherein a width of the pad is less than a width of the via.

23. (Previously Presented) The semiconductor device of claim 1, wherein the barrier metal comprises a metal selected from a group consisting of Ti, Ta, TiN, and TaN.

24. (Previously Presented) The semiconductor device of claim 1, wherein the barrier metal has a thickness between 200 and 800 Å.

25. (Canceled)

26. (Canceled)

Atty. Docket No. OPP030889US/PPW06-563DS  
Serial No: 10/676,645

27. (Currently Amended) The semiconductor device of claim 261, wherein the insulation layer comprises an oxide layer.

28. (Previously Presented) The semiconductor device of claim 23, wherein the barrier metal layer prevents the diffusion of copper from the metal line into the substrate.

29. (Previously Presented) The semiconductor device of claim 1, wherein the alloy layer is completely within the via.

30. (Previously Presented) The semiconductor device of claim 1, wherein the barrier metal layer covers all surfaces of the via.

31. (Currently Amended) The semiconductor device of claim 5, wherein the alloy layer is exposed through an opening in the padprotection layer.

32. (Previously Presented) The semiconductor device of claim 1, wherein the barrier metal has a thickness of ~500 Å.

33. (Canceled)

34. (Previously Presented) The semiconductor device of claim 1, wherein the barrier metal layer contacts the substrate.

35. (New) The semiconductor device of claim 5, wherein the pad is exposed through an opening in the protection layer.
